WELCOME

On behalf of the organising committee, it is our privilege to welcome you to the 1st Central India Hemato Onco Update, being held on 4th & 5th October 2025 at the prestigious Hotel Le Meridien, Nagpur.

This scientific conference is dedicated to fostering collaboration, knowledge exchange, and multidisciplinary dialogue among specialists from across the country. Over the course of two days, we will deliberate on advances in diagnosis, treatment, and research in hematology and oncology, with a special emphasis on the unique challenges and opportunities in Central India.

Objectives of the Conference: Provide a comprehensive update on recent advances in hematology and oncology. Encourage multidisciplinary collaboration in cancer care. Address region-specific cancer challenges in Central India. Promote evidence-based practices and early detection strategies. Strengthen the professional network among oncologists and allied specialists.

We are honoured to host more than 200 healthcare professionals, including Medical Oncologists, Radiation Oncologists, Surgical Oncologists, Hematologists, and Pediatric Oncologists. The sessions will feature expert lectures, interactive case discussions and panel debates on the latest clinical guidelines and evolving therapies.

Warm Regards,

Dr. Saurabh Prasad
Organising Chairman
Medical Oncologist,
KIMS-Kingsway Hospital, Nagpur.

Dr. Murtaza Bohra

CANCER INCIDENCE IN CENTRAL INDIA

Central India, particularly the regions surrounding Nagpur, presents a unique cancer burden influenced by demographic, environmental, and lifestyle factors. Data from regional cancer registries and tertiary care centres indicate: - Rising incidence of head and neck cancers, strongly linked to tobacco chewing, gutkha, and bidi smoking. - Gynecological malignancies such as cervical and breast cancer remain leading causes of cancer-related morbidity in women, often presenting in advanced stages due to lack of screening. - Hematological malignancies, including leukemias and lymphomas, show increasing diagnosis rates. - Pediatric cancers, particularly acute lymphoblastic leukemia (ALL), require specialized multidisciplinary care. - Environmental exposures, occupational hazards, and dietary patterns contribute significantly to disease patterns.

This conference aims to address these regional realities by sharing evidence-based approaches, advocating prevention, and strengthening early detection programs.

SCIENTIFIC HIGHLIGHTS

SCIENTIFIC SESSIONS

Lymphoma,
leukemia, solid tumors,
pediatric oncology,
immunotherapy.

Interactive Tumor Boards
for complex case discussions.

↑ Workshops for young oncologists
on diagnostics and supportive care.

We invite you to combine academic enrichment with the hospitality and culture of Nagpur.
